

Goulamina Lithium Project

EXPRESSION OF INTEREST (EOI)

Package Title:	MAIN CAMP SERVICES
Project Overview:	Leo Lithium Limited and its Malian subsidiary Lithium du Mali SA are developing the Goulamina Lithium Project in southern Mali (the Project). The Project comprises a standard open pit mining operation with a nominal 2.5 Mtpa processing plant producing a nominal 500,000 tonnes of spodumene concentrate per annum as part of Stage 1. The Project comprises a process plant, mine and mine infrastructure, and associated non-process infrastructure. There are future plans to expand the mine site, after 18 months of production, to produce up to 800,000 tonnes of spodumene concentrate per annum as part of Stage 2.
Project Location	The Project is located in southern Mali approximately 195 km by road south of Bamako (150 km direct distance) and 50 km west of the town of Bougouni. The Project site is located between the villages of Mafèlè (3.5 km south) and Goulamina (1 km north). 
Package Description:	The Contractor's Scope of Work is for the catering and cleaning of the Main Camp at Goulamina Lithium Project. Facilities described below: The camp comprises 216 accommodation rooms, as well as Wet Mess / Tavern, Clinic, Admin office/reception/shop, Gymnasium, Gatehouse, Multipurpose Court, Covered bus stop. In addition cleaning and servicing of Process Plant offices and change rooms - upon commencement of Operations. Prioritise local purchases, local labour hire, minimum % hires, in accordance with our local recruitment policies. Pioneer Camp Services contractor to be engaged as part of main camp services.
Key Information to be submitted through LONG	Proposals which include opportunities for local employment and/or business participation will be reviewed favourably.
