

Goulamina Lithium Project

EXPRESSION OF INTEREST (EOI)

Package Title:	MEDICAL AND EMERGENCY SERVICES
Project Overview:	Leo Lithium Limited and its Malian subsidiary Lithium du Mali SA are developing the Goulamina Lithium Project in southern Mali (the Project). The Project comprises a standard open pit mining operation with a nominal 2.5 Mtpa processing plant producing a nominal 500,000 tonnes of spodumene concentrate per annum as part of Stage 1. The Project comprises a process plant, mine and mine infrastructure, and associated non-process infrastructure. There are future plans to expand the mine site, after 18 months of production, to produce up to 800,000 tonnes of spodumene concentrate per annum as part of Stage 2.
Project Location	The Project is located in southern Mali approximately 195 km by road south of Bamako (150 km direct distance) and 50 km west of the town of Bougouni. The Project site is located between the villages of Mafèlè (3.5 km south) and Goulamina (1 km north). 
Package Description:	Contractor and its Parent Company to provide onsite Paramedic Medical services for the resident working population and daily Contractors at the Goulamina Lithium project site, utilizing a registered, qualified and current Advanced Trauma and Advanced Cardiac Life Support Paramedic to operate the Contractor owned and equipped ATLS & ACLS ambulance. The full package will include: 1 x ATLS & ACLS registered, qualified and current Paramedic. 1 x ATLS + ACLS equipped Toyota Landcruiser Ambulance V8 Model HJ78L- RJMRSV (hot weather variant). 1 x Malian registered, qualified and current Emergency Medical Technician Additional medical and emergency services may be procured as the project develops.
