

Goulamina Lithium Project

EXPRESSION OF INTEREST (EOI)

Package Title:	SUPPLY OF DIESEL FUEL
Project Overview:	Leo Lithium Limited and its Malian subsidiary Lithium du Mali SA are developing the Goulamina Lithium Project in southern Mali (the Project). The Project comprises a standard open pit mining operation with a nominal 2.5 Mtpa processing plant producing a nominal 500,000 tonnes of spodumene concentrate per annum as part of Stage 1. The Project comprises a process plant, mine and mine infrastructure, and associated non-process infrastructure. There are future plans to expand the mine site, after 18 months of production, to produce up to 800,000 tonnes of spodumene concentrate per annum as part of Stage 2.
Project Location	The Project is located in southern Mali approximately 195 km by road south of Bamako (150 km direct distance) and 50 km west of the town of Bougouni. The Project site is located between the villages of Mafèlè (3.5 km south) and Goulamina (1 km north). 
Package Description:	Fuel is required for drilling, construction and ongoing operations at Site. Services to include Supply of Diesel fuel at Goulamina including: • Supply of diesel fuel meeting Principal's fuel specification. • Design, supply and installation of facilities, equipment and technologies for the delivery and dispensing of diesel on site. • Potential additional storage infrastructure (volumes TBC) • Quality management for the supply of fuel. • Professional advice to LMSA in respect of supply of fuel (e.g. legislative requirements). • All associated logistics and customs clearances. • All reporting requirements. • Multiple delivery routes to Site.
Key Information to be submitted through LONG	Proposals which include opportunities for local employment and/or business participation will be reviewed favourably.

Goulamina Lithium Project

EXPRESSION OF INTEREST (EOI)

	Must provide personnel and capabilities/skills Evidence to be supported with key past client references for similar work and their contact details Evidence of quality assurance and quality control procedures
